PROFESSIONAL SUMMARY

Passionate Full Stack Software Developer with 3+ years of experience building dynamic web and mobile applications. Proven track record in end-to-end development, performance optimization, and collaborative team environments. Experienced in working with diverse clients across banking, healthcare, non-profit, and hospitality sectors, delivering market-ready solutions with a strong focus on user experience and technical excellence.

TECHNICAL SKILLS

Frontend	React, HTML5, CSS3, JavaScript, Typescript, Flutter, Responsive Design, UI/UX Implementation
Backend	Python, Flask, FastAPI, PHP, Laravel, Java, Node.js, Express.js, RESTful APIs, Redux, Redis, Jest
Databases	MySQL, PostgreSQL, MongoDB, Prisma ORM
DevOps & Cloud	Git, Docker, AWS, Firebase, Linux, CI/CD Pipelines
AI / ML	PyTorch, AI Chatbot Development
Other Tools	VSCode, Figma, PhpStorm, Android Studio, IntelliJ IDEA, R, Excel

PROFESSIONAL EXPERIENCE

Software Support Analyst

Dec 2025 – Present

[djava Factory Sdn Bhd](#) | Remote

- Provide frontline application support for clients on the COMEX / AI Shmikh Capital platform, maintaining timely and professional communication over email and WhatsApp throughout the full issue lifecycle—from acknowledgment to resolution.
- Diagnose and resolve platform issues by tracing through Quarkus application logs, database logs, and direct SQL queries against production schema; propose and execute corrective measures including data patches, configuration changes, and code fixes
- Contribute to the codebase by resolving bugs surfaced through support tickets and delivering feature enhancements on the JHipster/Quarkus full-stack platform
- Building the AI Shmikh Capital React Native mobile application (`com.djavafactory.comexmobile`), delivering secure, Shariah-compliant financial services on iOS and Android—including managing EAS/Expo build pipelines, Apple/Google provisioning, and secure API integration with the Quarkus backend
- Developing and integrating a Claude AI-powered chatbot into the AI Shmikh web application, engineering backend AI calls off the Vert.x event loop to prevent WebSocket blocking, and implementing graceful error handling to enable reliable customer support automation

DevOps Engineer Intern

Feb 2025 – Apr 2025

[Zendawa](#) | Nairobi, Kenya

- Led full-stack backend integration of DiabetesAI web application with Laravel-based portal via FastAPI
- Developed RESTful API endpoints enabling seamless specialist discovery and appointment booking functionality
- Deployed production-ready applications on AWS for browser-based testing with real-time functionality
- Optimized deployment pipelines and conducted comprehensive testing to ensure system reliability
- Ensured data integrity and security across Python-based AI engine and Laravel portal integration

Software Developer Intern

May 2024 – Jul 2024

Zulip | Remote

- Contributed to open-source project by resolving GitHub issues and improving CI/CD workflows
- Implemented clean, modular, and well-documented code following industry best practices
- Enhanced automation capabilities through GoCD integration, streamlining development processes
- Participated in code reviews and collaborative discussions with distributed international team

Full Stack Software Developer

Dec 2023 – Feb 2024

The Queen of Peace Initiative | Isiolo, Kenya

- Built complete web application from scratch with intuitive, responsive interface
- Integrated secure payment gateways (mobile money and credit/debit cards) with industry-standard compliance
- Developed backend infrastructure using Python and Flask, handling authentication and API communication
- Implemented comprehensive quality assurance testing to ensure stability and optimal performance

Full Stack Software Developer

Dec 2021 – Apr 2024

B&N International | Nairobi, Kenya

- Developed and maintained robust booking and reservation web application from the ground up
- Designed user-friendly interfaces with seamless workflows for efficient booking management
- Implemented regular maintenance cycles including security patches, feature enhancements, and performance updates

Teaching Assistant

Oct 2023 – Dec 2023

Kibo School of Technology | Nairobi, Kenya

- Supported course delivery and enhanced student learning experience in technology courses
- Provided personalized support through regular office hours and constructive assignment feedback
- Collaborated with instructional team to improve content delivery methods and materials

ADDITIONAL EXPERIENCE

Fellow, BeVisioneers Program

Jul 2024 – Present

Mercedes-Benz | Global

- Selected as global fellow to prototype sustainable mobility solutions
- Collaborated with multidisciplinary teams on circular-economy pilot for e-waste management
- Presented proof-of-concept to leadership, securing mentorship and seed funding

Participant

Jan 2025 – Mar 2025

Summer of Bitcoin Bootcamp | Remote

- Gained foundational knowledge of Bitcoin protocol and cryptography
- Contributed to Bitcoin open-source projects through guided mentorship
- Enhanced understanding of distributed systems and decentralized finance

EDUCATION

Bachelor's in Software Engineering

Sep 2024 – Present

African Leadership University | Kigali, Rwanda

Undergraduate Diploma in Computer Science

Jul 2023 – Aug 2024

Kibo School of Technology | New York, NY

Certificate in Full Stack Development

May 2019 – Aug 2019

Emobilis | Nairobi, Kenya

CERTIFICATIONS

- Blockchain Basics – Coursera (University at Buffalo)

- Blockchain Fundamentals V2 – IBM (2022)
- Track Donations with Blockchain – IBM (2022)
- Build Voting Application using Blockchain—IBM (2022)
- Build Car Auction Application on Blockchain – IBM (2022)
- Artificial Intelligence Intro – IBM Digital Nation Africa
- Internet of Things Intro – IBM (2019)
